

# Approximate Bayesian Computation parameter estimation population progress

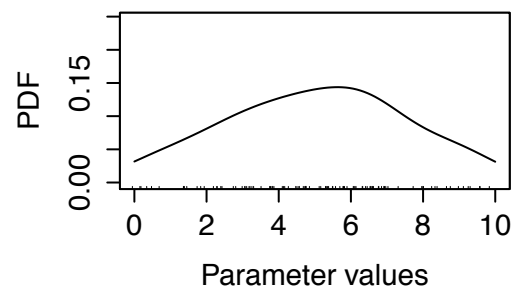

**Population7 compared to data**

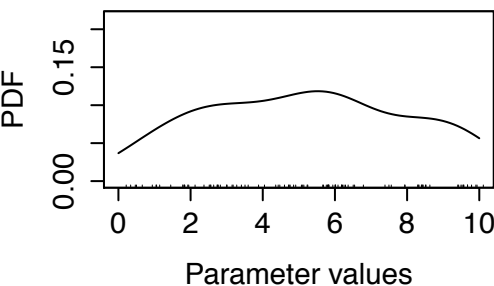

**Population 1,  $e=5$**

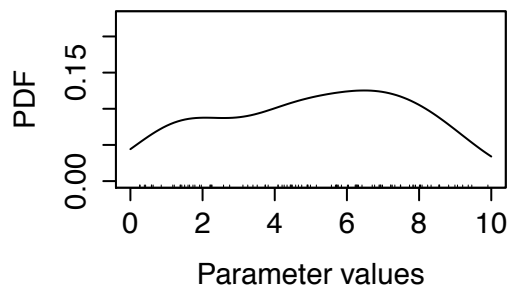

**Population 2,  $e=1$**

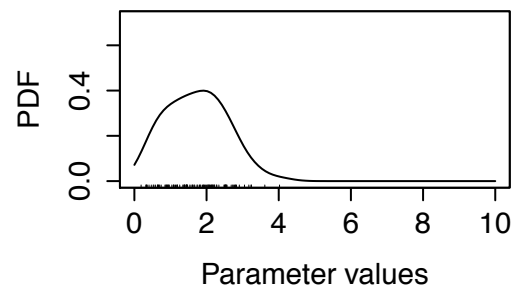

**Population 3,  $e=0.1$**

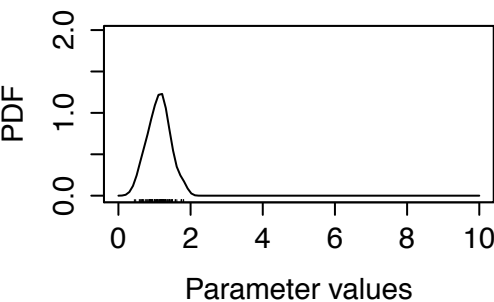

**Population 4,  $e=0.09$**

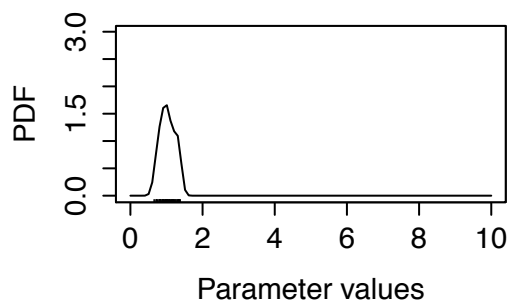

**Population 5,  $e=0.05$**

**Population 6,  $e=0.03$**

**Population 7,  $e=0.01$**

**Population 7, weighted**
